Action Items Discussed (2024.12.11)

* Multi-Tenancy Features : The system should support multi-tenancy, where a Super Admin can act as an Admin, manage Admin-level options, and perform Admin tasks when necessary. ✅

* Product Name and Product Logo ✅

Admin Web Features

1. Include a profile picture feature across the entire system. ✅

2. Validate unique User IDs. ✅

3. Add a Location field for companies.
   - For a company it should be like locations. ✅
   - Implement a hierarchy structure: Each company is the default entity. Multiple locations can be linked to a company. Users can select locations based on the company. ✅

4. Add a dark theme for the Admin app. ✅

5. Search functions for table contents ✅

6. Edit the page name QR Code generator to something like "Add Room" or "Add Location." ✅

7. Ensure consistent and unique design across all pages.(Next, Previous & Numbering) ✅

8. Make the Print QR Code option functional: Print QR codes with official templates, including the company logo. ✅

9. Add table or option for Admins to view denied requests. ✅

10. Implement auto-refresh for pages. ❗

12. Include a reply option for Contact Us message from admin. (One reply for one message) ✅

User App Features

1. Notify face registration for new user ✅

2. For face registration, users should upload five images to store their face data.
   - Countdown (like notify remaining counts) ✅

3. Add a dark theme for the app. ✅

4. Replied messages from admin can be shown. Like a notification icon kind of. ✅

5.Date selection should not allow past dates. ✅

6. Restrict the time between requested in time & Actual in time around half an hour before and after the requested time. ✅

7. Optimize the QR Scanning and Face Scanning process for smooth workflow.(Like one page) ❗

8. Bottom navigation ✅

9. Remove drop down in Face Registration ✅
